How we *Know* the Seeds we Sell are *Alive* and *Pure*

ALL Vaughan's Seeds are tested. We do not buy, nor sell, seeds which we do not **know** to be alive, and capable of growth. In order to say this truthfully, we spend a large sum annually in the maintenance of a testing laboratory, under the direction of an expert

analyst, a university graduate, who was trained in the seed laboratories of the United States Department of Agriculture.

Visitors to our laboratory are welcomed. It occupies spacious quarters in our warehouse, 601 West Jackson boulevard, Chicago, and tests every bag of seed received there. The tests applied are scientific, and accepted by law as proof of the life of these seeds and their ability to grow. On the basis of these tests we pay for the seeds, and sell them to you. So when our seeds do not grow

Fig. 1. Counting Seeds and Preparing Tests

for you, you may know it is not because they lacked vitality. Bad weather, bad soil conditions, or bad treatment, may cause a crop from good seeds to fail. These factors, a seedsman cannot control.

We can make sure that when we sell them they are good and in the hope that you are interested in knowing how we do this, we illustrate on this page, and shall describe in brief, the nature of the tests made in our laboratory—the largest and most complete, we believe, maintained by any garden seed house in the United States.

The Story of a Seed Test

SEEDS which are mature will germinate, as a rule, when subjected to proper conditions of moisture and heat. To germinate means to begin growing. In laboratory tests, the growth is shown by a sprout and the percentage of germination is determined by counting the number which develop healthy, vigorous sprouts after growth has begun. The sample which is tested, is taken by a careful method to insure that it is typical of the entire bag of seed. The illustrations tell the story of a seed test.

Fig. 1 shows an assistant analyst counting seeds and placing them on blotters, which are

used to provide the moisture needed. The blotters are moistened with care, for just enough moisture is needed; too much will make trouble.

Fig. 2 shows a germinating chamber, of which our laboratory has four. Each will hold over a thousand separate tests. The heat and humidity within the chamber can be controlled, and here the seeds are kept until they begin to grow.

Figures 3, 4 and 5 show seeds which have sprouted, with very different stories to tell. Fig. 3 is a bean test, very low and presence of mould proves many of the seeds are dead, and would merely decay in the soil. Such a test causes the seeds from which it is taken to be condemned to use as stock feed.

Figures 4 and 5 show excellent tests. The percentage of seeds which have made healthy sprouts in each case is between 90 and 100. Fig. 4 shows muskmelon seeds, and Fig. 5, healthy and live bean seeds. In contrast with Fig. 3 neither shows a trace of mould. These tests prove that the seeds are good, and only seeds which give such tests are sold by Vaughan's Seed Store

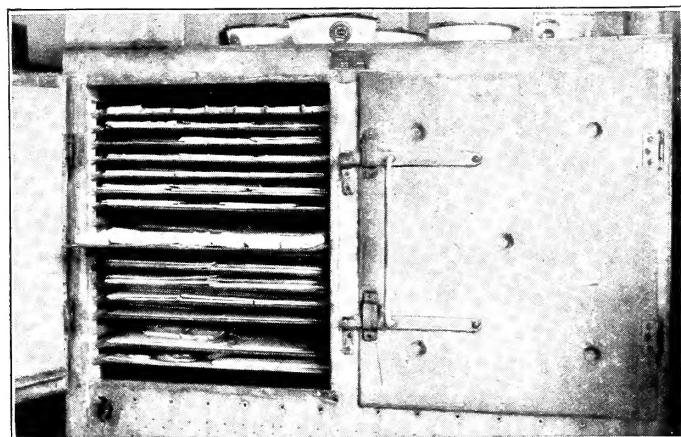

Fig. 2. Germinating Chamber Holding 1,000 Tests.

Where the Weeds Come From

OUR laboratory is also completely equipped for making purity tests. We know exactly how clean each lot of seed is and what weed content it has, if any. To the layman it appears very logical that if weeds come up in his lawn, the seed came in the lawn grass seed. While there is always a trace of the harmless weeds in all seed—due to the fact that cleaning machinery is not absolutely perfect, nevertheless, the percentage present is infinitesimal, while all soil in open ground contains great numbers of them. Practically all of the weeds have very long lived seed which may lie dormant for years. This is one reason they are so plentiful as to become classed as weeds.

Dear Friend:

Spring is coming! The first sign of it is our 1927 Book for Florists, which accompanies this letter. You will find it full of interesting news, but there is something to which I would like to direct your immediate attention.

First, will you not turn to Page 2 and read our offer to consign you a stock of seeds, in a beautiful display rack, for sale this spring? I am a seedsman, as you know; and I can give you some facts about the seed business which you may not have considered. The seed business is growing very rapidly; every town now has a garden club, and the number of persons who grow flowers and vegetables is increasing. If you have a shop in a neighborhood of homes, all these garden makers ought to be your customers. You can sell them vegetable plants, perennials, bedding annuals, etc. And the best way to sell them is to have our seed display prominent in your store, and our seed posters hung in your window soon to attract their eye.

Get an early start; we are shipping assortments already. In 60 days it will be time to begin planting. By that time you can have sold a good share of a seed assortment, and added to your list of customers a large number of sure prospects for plant sales later on.

A seed assortment is the best kind of an introduction to the garden makers of your neighborhood, and once you sell them, you have permanent customers, for they are interested in flowers all the year around, and in addition to bringing in other business, a seed side line is exactly what a florist wants to help out on expenses.

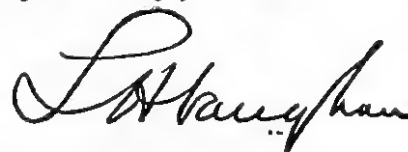

Seeds fit in with the florist's line; he is able to answer questions intelligently, and he can give planting service when it is wanted.

We believe that as gardening becomes increasingly ornamental, indulged in for recreation, florists will more and more become the seed merchants and horticultural advisors of their communities; and we want our customers to be leaders in this logical trend.

Our seed display fits a florist's shop. It is beautiful, as well as being easy to handle, and effective in selling. Read a complete description of our offer on Page 2, and then sign the contract at the bottom of that page and send it so you will be sure to get one of the 1927 assortments, which are going fast.

Don't overlook this chance to be a leader in this new idea.

Yours very truly,

You Can Have This Seed Display

Light in Weight, Alluring in Appearance, a Silent Salesman Irresistible

No Investment, No Expense, and a Good Profit

VAUGHAN'S SEED STORE'S patented poster seed racks are made of heavy mat board, of negligible weight, with standard paper easels; exactly like the advertising cut-outs which you use in window and counter displays.

They are faced with brilliant colored designs as illustrated, the work of high class artists, printed in colors on enamel paper, and varnished. The colored flower and vegetable packets are inserted in pockets, so arranged that half of the packet is visible, directly in the line of vision as the light racks stand on the counter. No garden lover can resist the temptation to pick the packets from the rack; and once in her hand, the sale is easy.

New Racks, New Seeds, and a New Sales Appeal

These beautiful racks with their brilliantly colored packets are bright, fresh and clean each season. And racks and packets unite in selling the real merchandise of the seedsman, which is not seeds at all, but the things seeds grow into. The glorious colors and imaginative designs of this display sell the garden and its bounty; they visualize the dreams that bring seed customers into your store; they have a sales appeal that cannot fail.

This seed display is yours without investment and without expense. It comes by parcel post, as its weight is negligible. Only the unsold packets are returned to us, for credit to your account; the racks are destroyed to be replaced with new ones the next season. You get 40% commission on the packets you sell.

The Season is Under Way. Act Now!

Whether you handle bulk seeds, or your own packets; or the commission boxes of other houses, you need Vaughan's display. It will help sell all your stock; and you are welcome to the help. Some of your customers will insist on Vaughan's Seeds, and these will not have to go unsatisfied.

Fill out this contract form and mail it today.

Summer-Flowering Bulbs

FOR WHOLESALE
TRADE ONLY

All Prices Subject to Change Without Notice.

THE following bulbs are either grown by ourselves on our own farms or on contract with experienced growers in the locality best adapted for their cultivation. Those classes like Hybrid Amaryllis, Begonias, Fancy Caladiums and Gladiolus, which can be improved by pollenization of class breeding are being noticeably improved each season by our growers.

VAUGHAN'S NEW HYBRID AMARYLLIS

One of the finest strains of Amaryllis we have ever seen, raised by two eminent growers whose entire stock and hybridization for a dozen years we have purchased in its entirety. Flowers are immense, borne mostly four to a stem, in an amazing and beautiful range of colors, blended, splashed and striped in a manner not seen in other strains. The bulbs are 2½ to 3 inches; are sure bloomers. Try 25 or 50; will retail quick at \$1.00 to \$1.50 in bloom.

NOVELTIES

Novelties in horticulture are as necessary to the florist as new styles in gowns are to the modiste. The public has the "urge" for something new which is carried even to the realms of flower shop and greenhouse. The successful florist constantly has his eyes and ears open for suggestions to meet this demand. Here we list briefly novelties of merit taken from the following pages: 17, 23, 25 and 31.

For Cut Flowers

GODETIA Gladiolus Flowered

Godetia

Gladiolus Flowered Double

Here is something worth while for the florist to satisfy the ever increasing demand for something different in cut flowers, with a gladiolus habit, but even more attractive—being very graceful. The flowers are double and should be cut before fully opened. Do not use any fertilizer.

Double Carmine, **Rose,**
Double Rosy Morn (Deep Rose).
Each, $\frac{1}{4}$ oz., 75c; trade pkt., 35c.

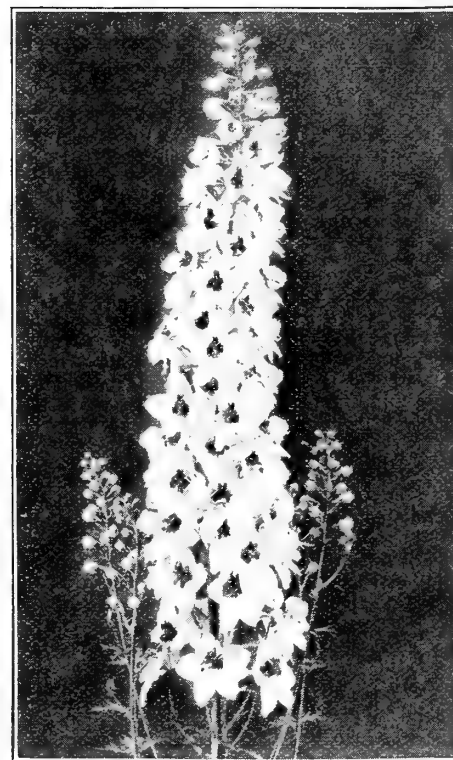

Delphinium

Blackmore and Langdon Strain

It was our pleasure this summer to see these in bloom and it is a memory-picture we would like to reproduce, but words are inadequate. They had a dignity peculiarly their own—tall, graceful spikes of bloom, covered from top to bottom with captivating blooms in charming color combinations. All the clear shades of blue with many delightful opaline variations. Some made one think of the inside of sea-shells, all with bees of contrasting colors. Trade pkt., \$1.00; oz., \$5.00.

Vanderbilt Hybrids

A Californian novelty of charming beauty. Immense flower stalks with great heads of bloom tapering to the tip. Nearly all flowers open at once and exhibit the greatest combination of colors known. Trade pkt., 50c; oz., \$4.80.

DELPHINIUM, Blackmore and Langdon Strain

For Bedding

VERBENA Luminosa

Ornamental Pomegranate

The seeds should be planted in flats in the greenhouse and when they are of suitable size to pick off, they should be planted in 2-inch pots and a little later in 4-inch pots where they will get established. As soon as the weather warms up sufficiently, they could be shifted to cold frames in the full rays of the sun and brought back into a forcing temperature about the last week in August and "forced" in a temperature of 60 to 65 degrees for the Christmas trade. They come into flower early, but the first flowers should be kept "nipped" until well on in September when they will begin to take on a general crop which will make them salable in December. 200 seeds, \$1.00; 1,000 seeds, \$4.50.

For Pot Plants

Verbena

Luminosa. The plants of this produce gigantic blooms of luminous flame pink, toning to softer shades of salmon, flesh and coral, giving the bed a most indescribable color which must be seen to be appreciated. Trade pkt., 50c; $\frac{1}{4}$ oz., 70c; oz., \$2.60.

Venosa. This is largely grown in parks. An upright grower about 1 foot high, flowers resemble heliotrope in color. A splendid plant for edgings and the rock garden. Must be sown early. Trade pkt., 25c; $\frac{1}{4}$ oz., 40c; oz., \$1.40.

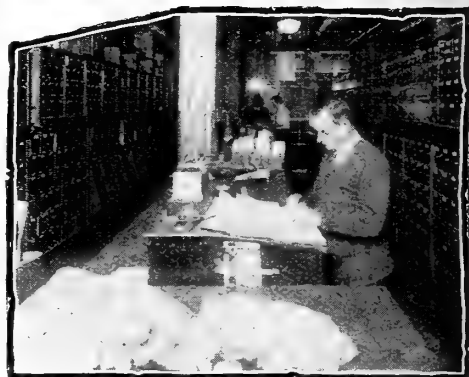

POMEGRANATE, Dwarf Ornamental

Vaughan's The World's Best Flower Seeds

Flower Seed Department—Florists' Trade Packets

SOME years ago flower seeds were only used to produce spring bedding plants or for outdoor sowing. Now, times have changed. Greenhouses besides housing Carnations and Roses are hosts to a variety of annuals, which experience has taught may be forced for cut flower purposes at a much less initial cost and far better financial returns. The Sweet Peas were the pioneers on this list and still maintain a prominent position, closely followed by Antirrhinums (Snaps), Calendula, Candytuft, Centaurea Clarkia, Cynoglossum, Didiscus, Larkspur, Gypsophila, Hunnemannia, Lupinus, Mignonette and Stocks. Every year new varieties are added to the list. This year we suggest Godetia, Gladiolus flowered in three different colors. These, like Clarkia, do best in poor soil.

Flower Seed Department—Bulk Shipments

For Pot Plants, besides the old standbys—Begonias, Cinerarias, Cyclamen and Primula, we have the new Ornamental Pomegranate or Christmas Bells—a plant of great beauty, which we introduced last year is now being raised successfully by florists all over the country for Christmas trade.

For Bedding Plants we have Ageratum, Asters, Begonias, Coleus, Lobelia, Pansy, Petunias and Verbenas.

The Perennial List is growing yearly as the public becomes more acquainted with the various ways in which they may be employed. Achillea, Campanula, Coreopsis, Delphinium, Digitalis, Gaillardia, Hollyhocks, Lupinus, Sweet William, Tritoma and Violas are part of this list.

The returns on the few dollars invested in seeds is out of all proportion to the returns on the amount necessary to invest in plants to occupy the same space.

It is our utmost endeavor to offer only seed of the highest germinating quality and purity. Our representatives travel both in Europe and America to look over the crops during the growing season and we are in constant communication with growers all over the world to keep us informed as to the novelties and improvements on the older varieties.

We welcome your business for flower seeds and we give it our careful and prompt attention.

Flower Seeds for Summer Sowing.—We issue a special circular in June. Should you fail to receive one, please write for it.

For seeds of perennials and biennials, see pages 29 to 35.

Trade packets contain considerably more seed than ordinary or retail packets, being based on Florists' needs for ordinary purposes.

Florists invariably get trade packets unless otherwise specified.

Quantities of $\frac{1}{4}$ lb. and over are charged at the pound rate; $\frac{1}{8}$ lb. at the oz. rate; $\frac{1}{2}$ oz., at the ounce rate, but only when the price per ounce is 40c or more, and is not otherwise quoted.

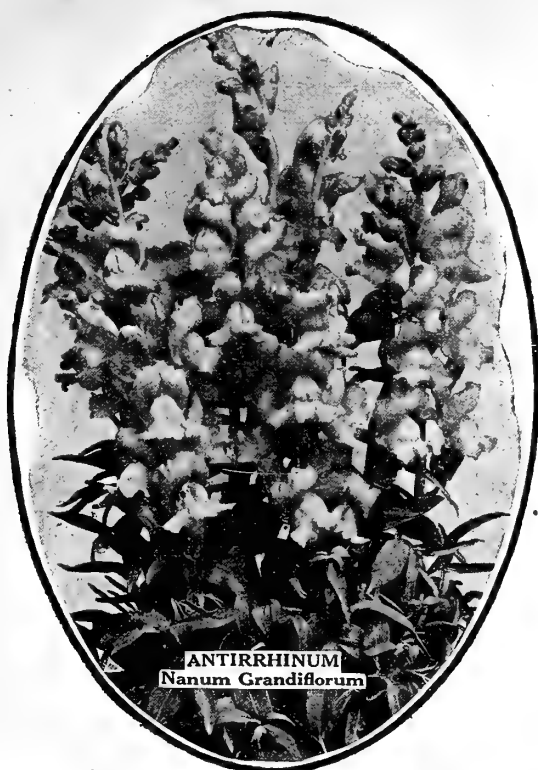

We do not sell $\frac{1}{2}$ oz. where the price per ounce is 15c or less.

Cash Discount.—On orders from this catalog over \$2.00 for Flower seeds, if cash is enclosed, 5 per cent. Except Cyclamen, the prices of which are net and 2 per cent on Asparagus.

Discounts on seeds in packets selected from our retail catalog: 25 per cent discount allowed on orders of less than five packets of one variety. See page 68 for discounts on packets to be resold.

THE SUNSHINE

Improved Anemone Flowered

One of the most attractive varieties. Some of the flowers have twisted petals and some have quilled petals; all have a cushion center of tiny quills of a contrasting color which makes a flower look as if it was covered with snowflakes. The blue flowers are dotted with a paler blue and some in white, and the rose in a lighter shade of pink or white. Their delicate beauty is hard to describe. A wonderful cut flower variety, borne on long, stiff stems, and the flowers last a long time after cutting.

This type of Aster was introduced by an English seedhouse several years ago, and later exploited by one of the Chicago private gardeners. We sent stock seed to a German seed grower, and he succeeded not only in selecting two more colors (white and lilac), but also eliminated a large percentage of single flowers from this strain, besides breeding the strain to a flat center, away from the anemone-quilled type.

EARLY BEAUTY—2 feet

This type has all of the characteristics of the Late Beauty Type, and is valuable for locations where the season is too short to flower the late type before frost, and for early forcing.

We wish to emphasize, however, that this is not an Early Aster as compared with Early Express or Queen of the Market, but earlier than the Late Beauty Type, which is the latest of all Asters. Planted at the same time this type flowers with the Crego and American Branching.

The habit is similar to the popular Giant Branching, vigorous in growth, long stiff stems. In form the flower is entirely distinct from any other variety; petals somewhat resemble the quilled varieties, but are much larger and broader, those in the center being curled and incurved, completely covering the crown. In shape and size the bloom is round, full and very large.

Butterfly Larkspurs are perennials and bloom from seed the first year.

Improved Giant Hyacinth Flowered. A very handsome flower which must not be confused with the old type of Hyacinth flowered Larkspur. The plants grow in one big spike, 3 ft. tall, broad at the base and tapering to a point at the top, resembling the best of the English type of perennial Delphinium (Larkspur). Blooms about a month earlier than stock flowered Larkspur.

Ornamental Pomegranate

A New Christmas Plant

The seeds should be planted in January or February in flats in the greenhouse and when they are of suitable size to pick off, they should be planted in 2-inch pots and a little later in 4-inch pots where they will get established. As soon as the weather warms up sufficiently, they could be shifted to cold frames in the full rays of the sun and brought back into a forcing temperature about the last week in August and "forced" in a temperature of 60 to 65 degrees for the Christmas trade. They come into flower early, but the first flowers should be kept "nipped" until well on in September when they will begin to take on a general crop which will make them salable in December and for several months following. 200 seeds, \$1.00; 1,000 seeds, \$4.50.

AQUILEGIA (Columbine)

Seeds of Biennials and Hardy Perennials

Many of the biennials and perennials are now as important to florists as Asters, Sweet Peas, Verbenas, etc., are among the annuals. Some can be forced, such as Delphinium, Canterbury Bells, etc., while many others sell as readily as Geraniums if grown

in pots, not to speak of the cut flower sorts, such as Coreopsis, Gypsophila, Chrysanthemum, Shasta Daisy, Physostegia, etc. They are really needed in every florist's establishment that caters to the better class of trade. The demand for them is increasing.

Vaughan's Roses for Florists

New and Choice Hybrid Tea Varieties

Briarcliffe. This rose is a sport from the well-known rose Columbia and has proven to retain all the good qualities of its parent with none of its faults. The color is more brilliant than that of Columbia without the salmon undertones of that variety—being a true rose pink. In fragrance it is of sweet tea-rose perfume. Strong, vigorous grower with dark green foliage and as free from mildew and black spot as any rose we know of. Price, 2½-in. pots, each, 35c; doz., \$3.00; 100, \$20.00.

LOS ANGELES. Color a flame-pink toned with coral and shaded with translucent gold at the base of the petals. Strong grower with stems as long as an American Beauty. The flowers are as large as Paul Neyron, forming long and pointed buds; its freedom and continuance of bloom are remarkable. Price, 2-year dormant, each, 70c; doz., \$7.50; 100, \$60.00.

PREMIER. A clear pure shade of rose-pink; deep rose-pink in cooler weather. Its freedom of bloom and quick succession of crops makes this a most productive variety. Price, 2½-inch pots, each, 20c; doz., \$2.00; 100, \$15.00. Ready May 1st, 4-inch, each, 40c; doz., \$4.50; 100, \$30.00.

TEMLAR. A clear even shade of red that is good both summer and winter. Has a good stem and takes pinching nicely. It is not in the big rose class but is of good size and can be cut tight like Mme. Butterfly, for shipping. Its wonderful freedom, combined with its color and fragrance, make it a strong bidder for popular favor. Price, 2½-inch pots, each, 20c; doz., \$2.00; 100, \$15.00. Ready May 1st, 4-inch pots, each, 40c; doz., \$4.50; 100, \$30.00.

Souvenir De Claudius Pernet. Color most striking sunflower-yellow, deeper in the center, without any color blending, and which is retained without fading even in the warmest weather. Price, 2-yr. dormant, each, 90c; doz., \$10.00; 100, \$75.00.

Souvenir De H. A. Verschuren. This new variety is a strong, vigorous grower. The center a beautiful apricot-yellow which shades to saffron-yellow at the edges and while during very unfavorable hot weather it will shade lighter its rich coloring is maintained better throughout the season than in any other hybrid-tea variety of similar color. Price, 2-year dormant, each, 90c; doz., \$10.00; 100, \$75.00.

ORNAMENTAL POMEGRANATE

A New Christmas Plant

Dwarf growing with bright scarlet double flowers. Pot into four-inch and place in cold frame in the full rays of the sun as soon as all danger of frost is over, keeping them pinched to make bushy plants. If they get well established in four-inch they can be shifted in five-inch about the middle of July. Care should be taken not to over-pot them as they should be well rooted through to get in bloom. Take in latter part of August and place in temperature of 60 to 65 degrees. They should be pinched back for the last time about the middle or September to give full crop for December.

Vaughan's VIGOR Strawberry Plants

Grown in Northern Michigan's Ideal Fruit Soil and Climate.

Our plants are grown under ideal conditions in Northern Michigan. Note illustration for root development of a single specimen. They have been developed from selected plants. We expect to make "Vaughan's Vigor" Strawberry Plant the standard for the country. We know you will be pleased. Varieties below are up to date.

Write for pamphlet on Strawberry Culture.

AROMA. (Per.) Late. One of the most popular late varieties. Fruit large to very large; holds its size well throughout all the pickings. Berry is roundish, conical, smooth and perfect in form and of a beautiful bright glossy red in color; very firm and of high quality. Its rich aromatic flavor has suggested its name. The habit of spreading which this variety possesses opens the way for the sunlight to reach the crown. The leaves are broad, clean and smooth and of a dark green color. Price, 100, \$1.25; 500, \$4.00; 1000, \$7.50.

COOPER. The large size and the beautiful brilliant color of the berries immediately attracts the attention of every one, but the greatest feature of all is that peculiar mild, delicious flavor not found in any other Strawberry. Due to the wonderful vigor of the plant this variety is adaptable to a wider range of soils and climate than any other variety. The foliage is immense, the big broad leaves often growing a foot high. This is due to the great root system, which goes down for moisture and enables the plants to produce the enormous load of big red berries even during continued dry weather. The unusual vitality of the plant carries every berry to perfect maturity—the last to ripen are as large as the first. Cooper is strongly staminate and can be grown alone and is an ideal mate of any of the pistillate or imperfect varieties due to the long blooming season. Price, 100, \$1.40; 500, \$4.50 1000, \$2.00.

DR. BURRELL. (Per.) Midseason. The berries are large, delicious and beautifully formed. The surface of the berry is a deep glossy red. The meat is solid. If you are looking for a good dependable all-purpose variety you will make no mistake in planting Dr. Burrell. In manner of plant growth this variety closely resembles Senator Dunlap, but will produce more, bigger and better berries, and ripening a few days earlier than Dunlap. Price, 100, \$1.25; 500, \$4.00; 1000, \$7.50.

GIBSON. (Per.) Medium early. Berries are large and regular in shape holding their size well to the end of the season. Color rich red. Flavor is neither sweet nor sour, but just right for canning. Extremely productive, in fact we know of no variety that will produce more quarts to berries per acre than the Gibson. It makes a strong vigorous plant that withstands adverse conditions admirably. This variety seems to embody every requirement necessary for a profitable berry. We recommend it and know you will not make any mistake in planting Gibson. Price, 100, \$1.25; 500, \$4.00; 1000, \$7.50.

PREMIER. (Per.) Early. Berries are large, beautifully formed, red through and through; flavor delicious. A splendid shipper. The deep heavy rooting system makes the plant a strong drought resister, and it is especially adapted to any soil or climate, giving you a big crop of fancy berries which will sell at highest prices. Where extra fancy early fruit is wanted we advise this. Price, 100, \$1.25; 500, \$4.50; 1000, \$8.00.

SENATOR DUNLAP. (Per.) Midseason. The fruit is dark red with glossy finish, shading to a deep scarlet on the underside. The meat is a bright red all through and exceedingly juicy. It succeeds everywhere and with everybody—the new beginner as well as with the veteran grower—but should not be allowed to mat too thickly. For a medium sized productive early to midseason berry you need not hesitate to plant Dunlap. One of the best and most popular. Price, 100, \$1.25; 500, \$4.50; 1000, \$7.50.

PROGRESSIVE. (Everbearing.) Has long been the leading everbearing variety. It now has to take second place as the new Champion is superior in every respect. The Progressive is a tall healthy grower, deep rooted and entirely free from fungus diseases. Very productive, berries medium size, good quality and delicious flavor. Price, 100 for \$1.50; 500, \$6.50 1000, \$12.00.

CHAMPION. (New Everbearing.) A strong, healthy, deep-rooted plant, very productive. Fruit similar to Dunlap in size, shape and color. A beautiful rich red color clear through, good quality and delicious flavor. The one mighty big feature of the Champion is that every plant bears a full crop of fruit, something that cannot be said of any other everbearing variety. Owing to its wonderful productiveness and its ability to bear through dry weather it offers wonderful possibilities to commercial growers. In addition to the wonderful fall crop produced by the Champion, they are the earliest to ripen in the spring. Price, 100 for \$1.50; 500, \$6.50; 1000, \$12.00.

MASTODON. (Everbearing.) The world's greatest everbearer because nothing like it was ever achieved before. Produces nearly 6000 quarts per acre during August, September, October and November. In size, quality, flavor and appearance Mastodon heads the list. Unlike other Everbearers, the plants of Mastodon are large, vigorous, heavily crowned and deep rooted. This explains their ability to produce enormous loads of fine fruit even under adverse conditions. Regardless of your past experience with Everbearing Strawberries we urge you to plant this wonderful New Everbearer this Spring. It will amaze you with the tremendous load of extra fine fruit produced by every plant. Price, 100, \$5.00; 500, \$21.00; 1000, \$40.00.

We have nothing but praise for the quality of the seeds this year and doubtless can do better next time.

Our own Sweet Peas from your Seeds, both Greenhouse and outdoors, have been and are perfectly fine—large blossoms, long stems, beautiful colors.

Will send remittance upon receipt of statement.

Sincerely,

SMITH'S GREENHOUSES,

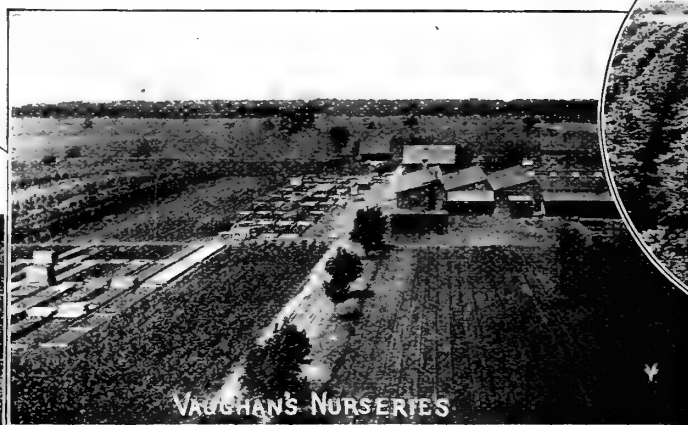

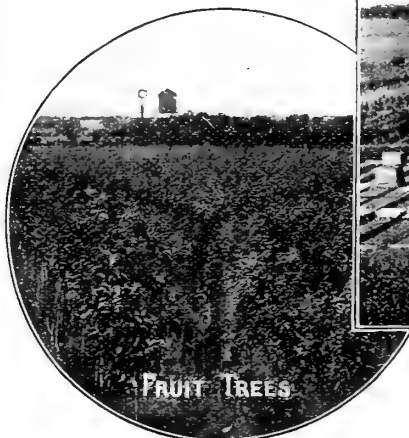

By Mrs. Asa M. Smith.

Ornamental and Flowering Shrubs

Our shrubs are Nursery-grown and are transplanted every two or three years. They are nice, shapely bushes with plenty of good fibrous roots, and are such plants as are in demand by the first-class retail trade. They should not be compared to stock that is never moved from the cutting or seedling beds until sold.

Our Nursery is located at Western Springs, 15 miles west of Chicago, on the C. B. & Q. R. R., two blocks south of 47th Street, on the continuation of East Boulevard.

Visitors are invited to inspect our stock at any time. We have a choice lot of specimens such as are not usually seen. Our customers will be pleased with the class of stock we send them.

Specimens. This term is applied to plants that are perfect in height and diameter as well as shape, and are recommended for immediate effect.

Fruit Trees

Since we grow these Fruit Trees mainly for our retail trade the quality is vastly superior to the stock ordinarily offered by Nurserymen, hence prices should not be compared to ordinary fruit tree stock. Our trees are just what the better class of retail customers require.

Vaughan's New Snowball

One of our Specialties. We know our strain is the equal of any that can be produced. We have tried nearly every other on the market and we have never yet come across anything superior to **Vaughan's New Snowball**. It is the result of years of careful selection by a most capable and painstaking gardener who grows the seed especially for us on the island of Amager, near Copenhagen, Denmark, where growing conditions are ideal for the production of perfect seed heads. **Vaughan's New Snowball** is the best general purpose variety for either spring or fall planting. Heads are usually 9 to 10 inches across, perfectly white, solid, deep and compact.

Pkt., 25c; ¼ oz., 75c; ½ oz., \$1.35; oz., \$2.50; ¼ lb., \$8.50; lb., \$32.00.

Vaughan's Earliest Dwarf Erfurt

Combines all pedigree points—earliness, purity of color, dwarf habit and fine grain. A profitable market garden sort.

Pkt., 25c; ¼ oz., 75c; ½ oz., \$1.35; oz., \$2.50; ¼ lb., \$8.50; lb., \$32.00.

Erfurt (Germany-grown). Pkt., 30c; ½ oz., \$1.60; oz., \$3.00.

Danish Snowball

This is a grand second early. It is the result of long, careful selection, and uniformly produces even, regular heads. Through many seasons it has proven itself reliable. Pkt., 10c; ¼ oz., 40c; oz., \$1.40; ¼ lb., \$5.00; lb., \$20.00.

No. 12 Planet Jr. Double and Single Wheel Hoe

A combination of Double and Single Wheel Hoe that has become the most popular in this and other countries. As a double wheel hoe the row can be straddled and worked both sides until the plants are 20 inches high. Then as a double or single wheel hoe, the crops can be cultivated both sides of the row and in the middle, thoroughly and quickly. Can also be used as a single wheel hoe wherever desired. The cultivating attachments permit one to do all the necessary plowing, opening and closing of furrows, hilling of plants and all the garden cultivation required. The side hoes break up the crust, kill the weeds, and pulverize the soil, which prevents evaporation of the required moisture. Rakes, Diso Hoes and other attachments can be added at any time. See Page 80 of the Planet Jr. catalog.

No. 25 Combined Hill and Drill Seeder, Double and Single Wheel Hoe, Cultivator and Plow

The No. 25 Combined Seeder, Double and Single Wheel Hoe is recognized by hundreds of users and recommended by them as being the "Complete Gardener." It sows practically all vegetable seeds, either in hill or drill, accurately and without waste. Practically any kind of cultivating can be done at any stage of growth of various crops with the variety of cultivating tools furnished with this machine.

It is valuable to gardeners or farmers who have enough acreage for a Double Wheel Hoe to be used, and yet prefer not to buy Seeders and Wheel Hoes separately, also for onion growers and for the large family garden where both a Single and Double Wheel Hoe can be used to advantage. The hopper holds four pounds of onion seed. It is thoroughly substantial and accurate in planting. Its simplicity, both as a seeder and as a wheel hoe, makes the combination thoroughly satisfactory. Holds 2½ qts. Weight, complete, 61 lbs. Equipment: One pair of 6-inch hoes; Four cultivator teeth; One pair plows; Two leaf guards; One marker. All oil tempered.

No. 8 Planet Jr. Horse Hoe and Cultivator

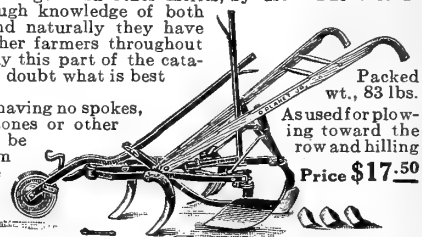

ONE HORSE IMPLEMENTS

Planet Jr. Horse Hoes are more widely known and bear a higher reputation than any horse hoes ever made. Their first appearance was hailed with delight by thrifty farmers, and they have been held in increasing esteem ever since by those who have learned their strength and other merits, by use. The various tools are the result of a thorough knowledge of all farming and manufacturing, and naturally they have attracted the attention of brother farmers throughout the world. We ask you to study this part of the catalog well and to write us when in doubt what is best for your purpose.

The new steel gauge wheel, having no spokes, will not clog with cornstalks, stones or other trash, and no sand or dirt can be carried up on the inside of the rim to drop on the bearings. The hub is cheaply renewed when necessary. This wheel fits all Planet Jr. Horse Hoes or Harrows. When ordering extra wheels, specify for which machine wanted, as the arms vary. Cast wheels can be supplied if wanted.

No. 8 Planet Jr. Horse Hoe and Cultivator. This style is a general favorite, being complete and easily operated. The tool is especially strong, being braced so as to make a stiff, unyielding implement intended for long continued service.

Equipment: Four 3x8-in. cultivator steels; One 4x8-in. cultivator steel. Two 6-in. hillers; One 7-in. shovel; Lever wheel (steel); Lever expander; Depth regulator.

No. 17 Planet Jr. Single Wheel Hoe

One of the leaders in the Planet Jr. Garden Tool line. Will do practically the same work as the double wheel hoes, but is much lighter. By putting the wheel on the outside of the wheel arm it is possible to straddle the row and cultivate both sides at one time. With the large garden plow the necessary plowing can be done, as well as opening furrows for fertilizer, potatoes, etc., and closing furrow—and hilling up plants. The 6-inch hoes break up and pulverize the soil and are great weed killers. The steel cultivator teeth, three in number, give you both deep and shallow cultivation between the rows; in fact, this assortment of tools gives you everything you need to thoroughly cultivate the garden.

VAUGHAN'S HIGH-GRADE FERTILIZERS

The Yield and Quality of Vegetables Depend Upon Continuous and Rapid Growth

It has been demonstrated that market-garden crops of the best quality are those which are grown under conditions which permit of a continuous and rapid development. Any delay in the growth of a lettuce or radish causes that sharp and pungent flavor of the former and the bitterness and toughened fibre of the latter, beets become stringy, etc. Plant food of the right amount

and kind controls the yield and quality of market-garden products more than any other condition, and it is neither wise nor economical to depend upon the natural condition of the soil or the application of stable manure only for profitable crops.

VAUGHAN'S LAWN AND GARDEN FERTILIZER (6-8-6)

Six per cent ammonia (nitrogen); eight per cent phosphates; six per cent potash.

This mixture differs from our balanced plant ration, in that it is composed of plant foods in mineral form. The advantages of mineral fertilizer include the absence of objectionable odor, and the quality of being more readily soluble, which makes it more quickly effective upon plant growth. The formula of this mixture, 6-8-6, is very close to that of Vaughan's Balanced Plant Ration. If it is necessary to store fertilizer in a cellar, garage or any similar place where a pronounced odor is objectionable, then the mineral fertilizer is preferable. This is an excellent mixture for regular use in the garden plot in small quantities to insure vigorous growth.

For a new lawn, broadcast evenly 30 to 40 lbs. per 1000 square feet. To stimulate an old lawn, apply 20 to 30 lbs. per 1000 square feet, and during the growing season, wash it down immediately with the hose to prevent burning. For flowers and vegetables, use from 4 to 6 lbs. per 100 square feet.

5 lbs., 45c; 10 lbs., 85c; 25 lbs., \$1.65; 50 lbs., \$2.65; 100 lbs., \$4.50; 250 lbs., \$10.90; 500 lbs., \$20.00; 1,000 lbs., \$39.00; 2,000 lbs., \$76.00.

BONE, BLOOD AND POTASH

Fertilizer Mixture (Analysis) 5-8-7

This is our best brand of concentrated manure; excellent for mixing into potting soil or as a top dressing. It is a money-maker. For potting soil, use about 20 pounds to a cubic yard of soil, and for the dressing scatter it about as thick as lawn grass is sown, after loosening the surface of the soil. It is excellent for Carnations if applied by the end of October or in November. It can also be applied as a liquid manure by using an 8-inch potful to a barrel of water. 25 lbs., \$1.40; 50 lbs., \$2.20; 100 lbs., \$3.35; 500 lbs., \$13.90; 1000 lbs., \$26.85; 2000 lbs., \$53.00.

BONE AND BLOOD.

For Cabbage, Cauliflower, Corn and other crops of big surface growth; not desirable for root crops except it is used in connection with potash, salts, or hardwood ashes, and if so used it is especially adapted to fruits, if applied early. For garden crops use 500 lbs. per acre. Price, 25 lbs., \$1.45; 50 lbs., \$2.15; 100 lbs., \$3.25; 250 lbs., \$7.65; 500 lbs., \$14.25; 1000 lbs., \$26.75; 2000 lbs., \$52.00.

PEAT MOSS GRANULATED.

A moisture retaining humus, an important aid in saving soil fertility. Better than manure.

Bale, about 190 lbs., \$4.50.

DRIED BLOOD

For top-dressing, for mixing with the soil, and for applying in liquid form, it is one of the best and safest nitrogenous fertilizers. It is splendid for roses, carnations, chrysanthemums and all kinds of pot plants. Price, 25 lbs., \$1.95; 50 lbs., \$3.45; 100 lbs., \$6.10; 250 lbs., \$13.75; 500 lbs., \$26.50.

ACID PHOSPHATE.

Sixteen per cent available. Bone phosphate the most available form. Used on grain crops and others requiring an excessive amount of phosphoric acid. Price, 25 lbs., \$1.15; 50 lbs., \$1.60; 100 lbs., \$2.20; 250 lbs., \$4.85; 500 lbs., \$8.30; 1000 lbs., \$15.00; 2000 lbs., \$29.50.

MURIATE OF POTASH.

Imported Potash once again available, should be used liberally, especially for all root crops. Price, 25 lbs., \$1.45; 50 lbs., \$2.15; 100 lbs., \$3.50; 250 lbs., \$8.45; 500 lbs., \$15.80.

HARDWOOD ASHES.

This is also a splendid fertilizer for the lawn and garden, containing all of the fertilizing elements except nitrogen. If used on the lawn at the rate of a ton or more per acre as a first application, and annual dressing of three hundred pounds afterwards, will insure a thrifty growth of dark color, exemption from ill effects of dry weather and freedom from weeds. Price, 25 lbs., \$1.00; 50 lbs., \$1.50; 100 lbs., \$2.10; 500 lbs., \$7.60; 1000 lbs., \$13.20; 2000 lbs., \$25.40.

HORN SHAVINGS.

Quick-acting and lasting. Price, 5 lbs., 85c; 10 lbs., \$1.45; 25 lbs., \$2.35; 50 lbs., \$4.15; 100 lbs., \$6.95. Write for prices on larger quantities.

AGRICULTURAL GYPSUM.

A high grade lime product for sweetening heavy and sour soils. Per 1000 lbs. \$2.00; 500 lbs., \$8.00; 1000 lbs., \$13.25; 2000 lbs., \$25.00.

PULVERIZED LIMESTONE.

For soil acidity, it improves the texture of the soil, lets in air and moisture, liberates nitrogen and other plant food, makes your soil sweet. Apply after the land is plowed or dug for a crop, scattering with a lime distributor, 2 tons or more per acre, a large handful to a square yard. Packed in cotton sacks. Price, 100 lbs., \$1.00; 500 lbs., \$4.50; 1000 lbs., \$8.50; 2000 lbs., \$16.00.

SOILTEX.

The new testing outfit approved by the Department of Agriculture, tells the acidity of your soil and exactly how much lime to apply. It is quick, accurate and easy to use, requires no special equipment. Goes in the pocket. Costs less than two cents per test. Price, \$1.00 per outfit.

Leaf Mold for Ferns. Clean Stock. Per bushel sack, \$1.20; 5 for \$5.25.

SULPHATE OF AMMONIA

Used for its Nitrogen. A very desirable fertilizer for all plants in which a large leaf development or rapid growth is desired. Use 1 pound to 50 square feet of ground or bench, or a tablespoonful to a bushel of soil, or 3 gallons of water. Price, 25 lbs., \$1.80; 50 lbs., \$3.15; 100 lbs., \$5.35; 500 lbs., \$22.00.

ORCHID PEAT

(Fern Roots). A wonderful fertilizer. Very useful for Orchids and Azaleas. Price, \$3.00 per sack of about 2 bushels; in 3 sack lots, \$2.75 per sack.

VAUGHAN'S "ROSE GROWER" BONE MEAL

This is a special brand we have put up for our trade. It is ground fine, hence acts quickly. Free from acid, and a superb article. It is made from bone accumulated in large slaughter houses, and should not be compared with the Bone Meal made from cattle heads and feet gathered upon the Western prairies. Our "Rose Grower" Bone has been slightly steamed to soften it and is thus quicker in its action. VAUGHAN'S SHEEP MANURE

This is a pure, natural Manure, and its effect is immediate; it is excellent for mixing with the soil for greenhouse plants—one part manure and six parts soil. Strewn over and dug into the vegetable garden or placed directly in drills or hills, it promotes a rapid, steady growth until maturity. It makes the richest, safest and quickest Liquid Manure. For use in liquid form, one pound to five gallons of water will make a liquid which can be used with safety daily if necessary.

Price, 25 lbs., \$1.15; 50 lbs., \$1.65; 100 lbs., \$2.65; 500 lbs., \$10.00; 1000 lbs., \$17.00; 2000 lbs., \$33.00.

SCOTCH SOOT. (Genuine Imported.)

Imported by our New York branch and shipped from New York only. Prices F.O.B. New York. Gardeners know the value of the genuine article for stimulating a healthy growth of dark green foliage, and its beneficial effect in freeing the soil from slugs, grubs and cut worms. Price, 25 lbs., \$1.75; 50 lbs., \$3.00; 100 lbs., \$5.80; 500 lbs., \$25.00.

NITRATE OF SODA or Chili Saltpeter.

Nitrate of Soda is not a substitute for other Manures, but we recommend it as the cheapest and best form in which to apply Nitrogen to plants. Gardeners who are using farm manure should continue to use it, but use Nitrate of Soda in addition to other fertilizers. If your object is to grow maximum crops you must furnish the plant with Nitrogen.

HOW TO USE NITRATE OF SODA

Remove the lumps before using and break them up, which can be done by pounding. Use as a top-dressing at the rate of 100 lbs. per acre on the following vegetables, when plants are well established: Beets, Cabbage, Cauliflower, Cucumber, Celery, Egg Plant, Lettuce, Spinach, Onions.

For Asparagus, a top-dressing of 250 lbs. per acre just as soon as the first shoots make their appearance. For Strawberries, a top-dressing of about 100 lbs. per acre after the plants have blossomed.

For the Home Garden apply as a solution one ounce to two gallons of water. Price (subject to market changes), 25 lbs., \$1.90; 50 lbs., \$3.15; 100 lbs., \$5.30; 500 lbs., \$24.00; 1000 lbs., \$44.75; 2000 lbs., \$88.00.

FLORANID UREA.

A highly concentrated organic fertilizer containing 46 per cent. available nitrogen, clean, odorless, stainless, for flowers, vegetables, berries, shrubs, lawns, ornamental and fruit trees; 92 times stronger than manure. Price, lb. can, 75c; 50 lbs. for \$11.00.

SHREDDED CATTLE MANURE.

An efficient, high grade natural fertilizer for all general purposes, manufactured by special process from selected fresh cleanings from cattle pens. There is no offensive odor, and when spread on lawn and garden it works down into the soil so that there is no refuse to blow about or be raked off when the growing season begins. If applied to the lawn in the fall it protects the grass roots all through the winter. It is as easy and clean to handle as grain, being perfectly dry and can be stored anywhere until wanted for use. Price, 100 lbs., \$2.65; 500 lbs., \$10.00; 1000 lbs., \$17.00; 2000 lbs., \$33.00.

CLAY'S FERTILIZER.

Imported by our New York branch and shipped from New York only. Prices F.O.B. New York. This valuable imported manure is especially recommended to all who grow either fruit, flowers or vegetables, and wish to bring them to the highest perfection. It should also be used in potting soil as a top-dressing. Price, 7 lbs., \$1.35; 14 lbs., \$2.10; 28 lbs., \$3.65; 56 lbs., \$6.50; 112 lbs., \$11.90.
